Experience

Family Dollar, Mobile Developer, Nov 2014 – Present

- Collaborated with multiple suppliers to review, test and integrate the most optimal mobile printers for handheld devices
- Contributed to development of 1 Android & 5 iOS mobile applications:
 - I&P – Android application used for inventory transactions, with the ability to communicate with Zebra and Honeywell thermal printers to generate shelf labels
 - Alert! – App to measure the money that was missing after being recorded by store operators
 - MScan – A scanner app used by the HR department to capture sensitive documents
 - RED – App to keep tabs on metrics that might affect in-store performance
 - MoPo – App used by managers to see their stores performance in relation with 7,964 stores
 - Visit – Auditing app to improve the efficiency and effectiveness of each store

La Casa de los Pixeles, Senior Software Developer, Jan 2014 – Oct 2014

- Gathered requirements, created business opportunities and negotiated business arrangements
- Developed a white label Software application to manage theater accounts
- Designed and implemented an API Mashery from multiple resources like West World Media, GoWatchIt and Metacritic services

Digizent International, Software Developer, Jan 2012 – Dec 2013

- Collaborated with team of 10 software engineers to develop a formal Grammar and Recursive Descent Parser language called “Molecular Embedded Rule Language” or MERLin for short, with the ability to change content such as payment forms, images, text or html files into dynamic content presentation
- Programmed custom E-commerce and informational web sites for small businesses
- Added source control, testing/production environments, and published a process flow diagram for existing architecture

Zutri Consulting Firm, Software Developer, Apr 2010 – Dec 2011

- Participated in the creation of a locking system using Sentinel HASP keys to manage software licensing
- Designed and implemented SQL scripts to solve database compatibility problems with a client’s ERP system
- Created a small Loyalty Program to help micro enterprises to achieve customer relationship strategies

Estudio Indiga, Web Developer, Apr 2009 – Mar 2010

- Made regular contributions to Mead Johnson Nutrition México website by programming custom modules to manage the product brand catalog
